What were the three most important items you learned in the class?

Comments
The three most important items I learned in the class are how to use 'what if' functions, apply conditional formatting, and the benefits of Microsoft Excel and Microsoft Access.
1) excel 2) access 3) excel formulas
Didn't learn much, went too fast and too advanced – hard to really grasp any of it. Did learn some shortcuts and formatting things that will be useful.
learning literally everything about advanced excel learning about the software access navigating and helping others through steps and teaching
Shortcuts in Excel, How to create awesome graphs, learning about Access
how to use excel and access, hot to read and make graphs, and analyzing data
How to use Excel Vlookups and Hlookups That access exists and is very useful

Which assignment gave you the best opportunity to demonstrate how well you learned the skills and material taught in this course?

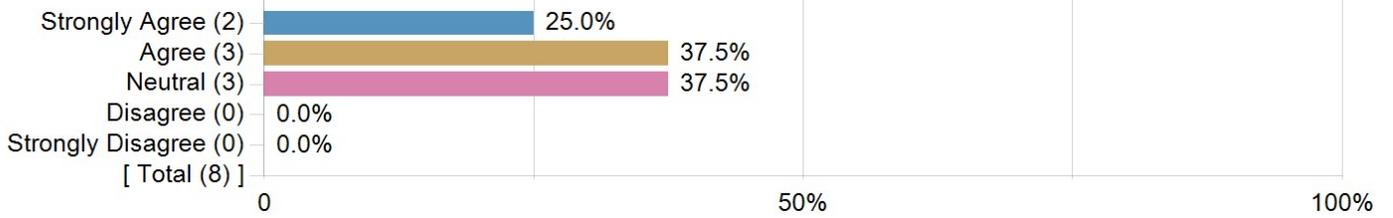

Comments
The assignment that gave me the best opportunity to demonstrated how well I learned the skills and material taught in this course was the case studies.
The homework assignments because we did everything in class together. It was still hard though and I feel like I could use extra help in some functions like vlook-ups. There was no real instruction on how to do some things so it was a lot of self teaching. It was also hard because everything was in mypearson labs so she wasn't overly hands-on with the teaching. In addition, homework assignments were always getting moved around so it was hard to keep up with work with no communication. She would also never respond to emails which made it hard to get questions answered. But she was always willing to help us out and was friendly.
none
the grader projects at the end of every chapter
Outside of class work in Finance and Accounting
Case studies, although they are hard
The Excel hw was the best because it helped us understand all the functions.

What did the instructor do to create an engaging and/or supportive learning environment for you?

Comments
Professor Fleury created an engaging and supportive learning environment for me by demonstrating important steps in a timely manner for all students to understand and ask questions.
Her office hours were the most beneficial because I got the one on one help that I needed. She was also able to walk through the problems with me. In class it feels like every man for themselves. We are all confused and she tells us to help each other if we miss something, but then it snowballs into more students being lost.
none
engaging teacher most of the time, very friendly which helps
Nothing
She would address the problems i had on the board and give me personal insight in my problems.
